FIREPROOF MULTIMEDIA SAFE

Real security for a virtual world

 **Fichet-Bauché**
for a safer world

VULCANE

The compact safeguarding solution
for your multimedia data carriers

E-mail, Intranet databases, e-commerce...

Your business activity is becoming de plus en plus
virtual and multimedia-based: audiovisual materials,
CAD/CAM, prepress, Web pages...

To help protect you digital data,
Fichet-Bauche has developed
a range of fireproof cabinets: **VULCANE**.

VULCANE is a small, lightweight safe that offers
exceptional fire protection.

It can be placed anywhere, next to or under
your desk (**VULCANE 40** model), and
provides maximum convenience
at an affordably low price.

**55°C: Say good-bye
to your data!**

At 55°C any data recorded on a
magnetic data carrier, such as
a diskette or a Zip disk, is
irremediably lost. Yet during a
fire, temperatures may easily
reach 1200°C.

**Bug
insurance**

Fire Protection:

The **VULCANE** safe has been
subjected to the most stringent
tests in the market, recreating
the actual conditions of a serious
accident. The **VULCANE** safe
has also been tested in a fire
situation simulating three storeys
of floorboards giving way. It has
also proved effective in safeguar-
ding data against dampness, dust
and magnetic fields.

Vulcane 40 Africa model

VDMA 24991-1-compliant

VULCANE "Security" meets the requirements of the internationally recognised VDMA 24991-1 standard, protection class S60 DIS. This guarantees that your data benefits from the highest level of security currently available.

VULCANE, simply elegant

Its shapes adapted to the curves of nature. Modular fittings. The safe door can be simply slammed shut in an emergency.

VULCANE was designed for ease and speed of use. Safeguarding thus becomes a natural instinct.

Perfect proportions of the cube. Elegantly rounded half-moons. Compact dimensions. From all points of view, **VULCANE** easily fits into any modern office space, and **VULCANE 40** was specially designed to slide under your desk.

A safe to be admired in 3-D!

Ad'hoc fittings

The interior fittings of **VULCANE** adapt to your needs. They may be adjusted to safely accommodate CD-R, DAT, video disks, DVD, Zip, etc...

▶ **VULCANE** reminds us that no shape is more elegant than a curve.

▶ **Interior dividers** may be adjusted to perfectly accommodate various formats: Zip, Jaz, CD, DAT...

▶ The **drawers** slide open and shut effortlessly to provide easy access to your data carriers.

▶ The **rounded** handle fits naturally into the palm of your hand.
